

Scope

The ILL/ESRF International Student Summer Programme on X-Ray and Neutron Science is aimed at **undergraduate students**. It will consist in a **4-week experimental project** embedded in a research group of ESRF or ILL, together with a **series of introductory lectures** on the principles and applications of X-ray and neutron science (magnetism, materials science, soft matter, structural biology, imaging, etc.).

Location

The Summer Programme will take place at the **European Photon & Neutron Science Campus** (EPN), hosting the ESRF and ILL, located in Grenoble.

Eligibility

Undergraduate students from a **Member Country (or Scientific Associate Country) of ESRF or ILL** are eligible to the Summer Programme (see detailed list on web site below). The number of participants is limited to about 20.

Financial support

All **selected participants** will receive a financial support and free accommodation in Grenoble.

Organization Committee:

Patrick Bruno (ESRF), Paul Steffens (ILL), Laurence Tellier (ILL)
