

“Prospecting and Exploration for Polymetallic Sulfides in the Indian Ocean”

Dr. Ingo Heyde

Geophysicist in working unit "Marine potential field methods", BGR Hannover (Germany).

The talk gives an overview of the used geophysical (magnetics, gravity, electromagnetic) and geological/geochemical methods and the general strategy to define the prospective areas.

Giovedì 10 Dicembre ore 16:00

Aula Ex-biblioteca

Dipartimento di Fisica e Geologia - Università degli Studi di Perugia
