

1st Earth Sciences webinars cycle

Frontiers in Geosciences hosted @UniPG

A.D. 1308

unipg

DIPARTIMENTO
DI FISICA E GEOLOGIA

Lynn Soreghan University of Oklahoma

Dust in Permian Equatorial Pangaea

May 13, 5 p.m.

Lisa Borgatti Università di Bologna

*Monitoring, modelling, and mitigating landslide risk
in cultural heritage sites in Northern Apennines*

May 27, 5 p.m.

Donald B. Dingwell Ludwig-Maximilians-Universität

Viscosity triggers in volcanic eruptive style

June 10, 5 p.m.

Paolo Tarolli Università di Padova

The Geomorphology of Life

September 30, 5 p.m.

Maria Luce Frezzotti Università di Milano Bicocca

Diamonds and origin of life

October 14, 5 p.m.

Fabio Florindo Istituto Nazionale di Geofisica e Vulcanologia

Antarctic geological drilling: drilling back to the future

November 18, 5 p.m.

Emanuele Forte Università di Trieste

*A powerful tool for multiscale rock mass characterization: the
Ground Penetrating Radar*

November 25, 5 p.m.
