

## Postdoc Position in Gamma Ray Astronomy - CTA and H.E.S.S. -

The Elementary Particle Physics Group at the Physics Department of Humboldt University Berlin (<https://www.physik.hu-berlin.de/eephys>) invites applications for a postdoc position in very high-energy gamma-ray astronomy. Candidates are given the opportunity to participate in the analysis of H.E.S.S. data (galactic sources, multi-wavelength studies, dark matter searches) and to play a strong role in the design and implementation of the array control and data acquisition system for the future CTA gamma ray observatory (<http://www.cta-observatory.org>). CTA activities will be carried out in close cooperation with DESY in Zeuthen which operates a 12m CTA prototype telescope on the Adlershof Campus in Berlin.

Applicants should hold a PhD in physics with a focus on astrophysics/ astronomy or elementary particle physics. Software skills and experience in the operation of astrophysical observatories or particle detectors would be assets.

The opening is available after July 2014. Applications will be considered until the position is filled. The position is initially limited to two years with a possible extension by one year. Salary (TV-L HU, E13) and benefits are commensurate with public service organizations in the Land of Berlin.

Humboldt University Berlin is an equal opportunity, affirmative actions employer and encourages applications from women.

Applications quoting **CTA14-17** must be sent to:

Prof. Dr. Thomas Lohse  
Humboldt University Berlin
